

T-RAILER®

The T-Railer® allows Gregg Drilling to provide drilling and Cone Penetration Testing (CPT) services to rail accessible sites and railroad projects. This unique solution to difficult access rail sites is an economical and efficient way to move equipment and materials to the site or operate directly on the tracks.

Within minutes the T-Railer® can be set on the tracks or put back on the highway. It eliminates the need to purchase or rent a special machine each time you need to operate or move equipment on the rail lines.

CAPABILITIES

- Self-propelled with enough horsepower to move an 80,000lb load at 15 mph in forward or reverse.
- Detachable loading ramps allow quick loading by driving the equipment directly onto the deck.
- Can access and connect to rail lines from any access road at any angle to the tracks.
- Equipment can operate directly off the T-Railer® to complete borings or CPT directly over the rail lines.

SPECIFICATIONS

- Maximum speed of 15 mph
- Overall length of 44'
- Platform dimensions 26' long by 8'6" wide.
- Load capacity of 80,000 lbs.
