

CITY WATER WELLS

Gregg Drilling is a family run business based in California since 1985. We are highly experienced and strive to provide our clients with our three tenants of service: QUALITY, SAFETY & VALUE.

Gregg Drilling has a 30-year history working within California with various government agencies including municipal and county departments for water and power, port authorities, water districts and individual city governments. Gregg also has worked on major infrastructure projects with Caltrans and is currently providing drilling and site investigation services for the High Speed Rail Project. Gregg has also worked closely with the Department of Water Resource in California to evaluate the aqueduct system as well as levees in the Sacramento area.

FULL-SERVICE WATER WELL PROVIDER

Gregg Drilling is a full service provider for Municipal Water Wells. We can provide a turn-key solution to your water needs by providing:

- Well design and site selection
- Drilling of the well
- Installation of the well casing and screen section
- Well Development to ensure proper water flow into the well
- Submersible pump installation

TRUST OUR QUALITY

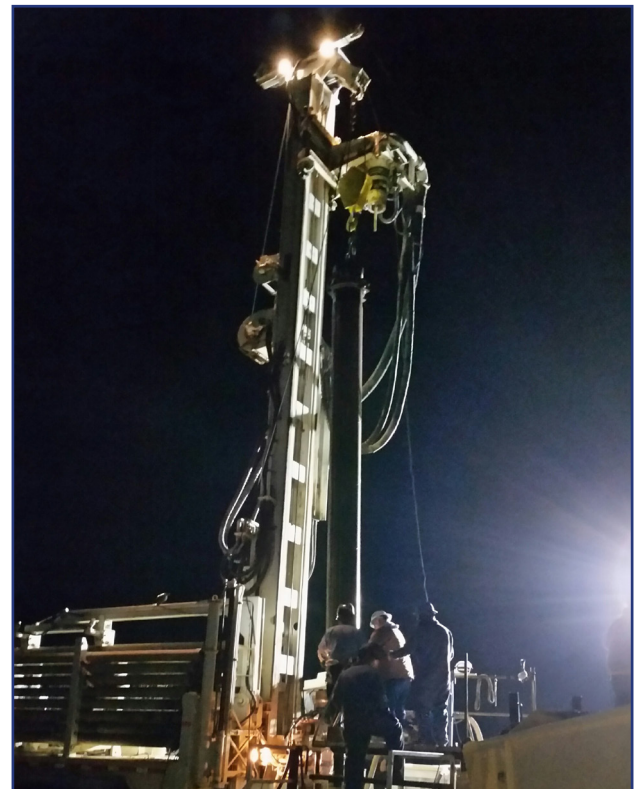

Gregg Drilling is at the forefront of new technology and research in the drilling business. By constantly upgrading equipment and working with our drilling professionals to create safer and more efficient practices, Gregg is pleased to have one of California's highest safety records. Recently Gold Shovel Certified, Gregg's employees all undergo rigorous safety training on a yearly basis and many have been with the company since its early days 20 and 30 years ago.

For more information or a quote, please contact **Mark Kassity**: 714-801-2613 or at mkassity@greggdrilling.com

Gregg Drilling's highly experienced drillers operate Fraste F5400 drill rigs to install water wells. This robust drill that can operate in direct mud rotary mode, or for deeper well installations, using reverse circulation.

Gregg can operate 24-7 to complete the well installation and development efficiently saving money and avoiding disruption to services.

QUALITY • SAFETY • VALUE
