

# ROTARY DRILLING & CORING EQUIPMENT

Truck, track and skid mounted rotary drill rigs are all part of Gregg Drilling's range of equipment. Boring rigs are equipped with automatic SPT hammers and can be used for geotechnical, environmental, construction drilling and coring projects.

## DRILLING METHODS

- Mud Rotary - direct and reverse circulation
- Air Rotary - direct and air rotary casing hammer
- Rock Coring - dual and triple tube, BQ, NQ, HQ, and PQ

## SUPPORT EQUIPMENT

- Trailer and skid mounted mud systems (shaker screens combined with sand and silt cones)
- Rig tenders with water tanks up to 2000 gallons
- A variety of sampling equipment including:
  - Pitcher Barrel Samplers
  - 101 mm coring systems
  - HQ, NQ, BQ and PQ rock coring
  - SPT and Modified California Split Spoon Samplers

Versa Drill V100 can be used for soil liquefaction & environmental investigations and well installations.

The Speed Star 30K is capable of drilling 1000+ feet and installing wells to 500+ feet. With 30,000 lbs of pull back and a casing hammer, this rig drills efficiently through rock deposits.

The Fraste MD/XU is a top head drive rotary rig with make up/break up clamps also capable of rock coring.

## CAPABILITIES/FEATURES

RIG	Boring Depth	Boring Diameter	Maximum Well Diameter	Carrier
<b>Versa Drill V100</b>	500'+	4" - 20"	14"	6x6 AWD Truck
<b>Mobile B-80</b>	500'+	4" - 20"	14"	Truck
<b>Mobile B-80 Track</b>	500'+	4" - 20"	14"	Track
<b>Mobile B-80 Skid</b>	300'	4" - 14"	4"	Skid
<b>Mobile B-53</b>	240'	4" - 8"	4"	Truck
<b>Fraste FS-400 *</b>	1200'	6" - 26"	26"	Truck
<b>Fraste MD/XU</b>	500'+	4" - 18"	12"	Truck
<b>Fraste MD/XL</b>	400'	4" - 10"	4"	Track
<b>Speed Star 30K</b>	500' +	6" - 24"	14"	Truck
<b>Speed Star 50K</b>	800'	6" - 24"	16"	Truck
<b>CME 45</b>	150'	4" - 8"	4"	Trailer
<b>CME 850</b>	400'	4" - 8"	4"	Track
<b>Failing 1500</b>	500'+	4" - 10"	6"	Truck
<b>Mito Rig</b>	500'	4"	4"	Track

\* Indicates reverse/direct circulation.
