

GREGG DRILLING LLC

NEAR-SHORE MARINE BARGE SERVICES

Overview

Over the past 20-years, Gregg has conducted a wide variety of near-shore and marine drilling and testing projects. In addition to Gregg's boat the R/V Quin Delta, Gregg has used

marine barges, sectional barges, modular jack-up barges, and lift boats. Overwater projects have a unique set of challenges that Gregg is ready to handle with skill and ease.

Features

- Gregg owns and operates its own marine equipment: R/V Quin Delta drill ship, modular barges, and support boats
- Gregg will also rent, charter or subcontract equipment for specific projects
- Experienced working in nearshore areas across North America including: California, Alaska, Canada, and Mexico
- Completed projects in the Gulf of Mexico, East-coast of the US, Puerto Rico and Australia
- Gregg personnel are experienced and licensed for marine operations
- Network of partners to offer a full suite of services including: vessel/barge positioning, marine surveying, dive support, ROV support etc.

SERVICES:

- Mud rotary and geotechnical sampling
- Piezocone Testing (CPT)
- Seismic CPT
- Vibracore sampling
- Gravity coring & benthic sampling
