

# GREGG DRILLING LLC

## DIRECT PUSH SERVICES

### Limited Access & Specialized Equipment

Direct push technology allows Gregg Drilling LLC to collect continuous logs and undisturbed samples in less time and at a lower cost. Gregg operates a range of truck mounted, track mounted, and limited access direct push sampling rigs. Unlike conventional drilling, direct push technology creates minimal soil cuttings which, if contaminated, require special handling and costly disposal. In addition, the small size and rubber tracks on some of these rigs allow access to a wide variety of constricted locations, both indoor and out, with minimal site disturbance.

### Specifications

	MAX DEPTH DIRECT PUSH	LENGTH	WIDTH	TRAVEL HEIGHT	WORKING HEIGHT
<b>TRUCK MOUNTED</b>					
Mart 2.5T	50'	26'	8'6"	8'6"	12'6"
<b>TRACK MOUNTED</b>					
Geoprobe 7822*	80'	12'8"	5'10"	8'4"	15'7"
Geoprobe 3230*	120'	14'	6'8"	9'6"	23'1"
Rhino M5T*	50'+/150'	12'6"	6'	8'2"	12'10"
Marl 1.5T Warthog	30'	9'	3'	5'6"	7'
Marl 2T Badger					
Geoprobe 420 (conn.)	30'+	3'	9'1"	5'4"	7'10"
Geoprobe 420 (dis.)	30'+	2'10"	1'11"	5'2"	7'10"
Ramset Portable	50'+	2'	2'	4'	4'

\*indicates equipment has SPT auto-hammer

### SERVICES:

- Soil, soil gas & groundwater samples using dual-tube sampling system (Geoprobe)
- Compliant with DTSC soil gas advisory and PFAS sampling guidelines
- High resolution site characterization with MiHPT
- Injection of compounds for remediation
