

GREGG DRILLING LLC

SCORPION TRACKED ACCESS SERVICES

Overview

Gregg utilizes a scorpion limited access track rig to provide a safe and effective means to conduct geotechnical and environmental site investigations. The scorpion rig allows for CPT testing in tight spaces, construction sites and other limited access site conditions.

Features

- Small footprint for limited access sites
- Short mast (11ft max) is advantages for indoor work
- Rubber tracks
- Engineered anchor systems for safe and effective rig anchoring
- CPT testing is done from the back of rig which is ideal for working close to buildings, pipelines etc.
- Fully compatible with Gregg's full suite of CPT tools (CPT, seismic CPT, MiHPT/EC/UVOST)

Specifications

Length/Width: 10.5 ft x 6ft

Working height: 11 ft

Push capacity: 20 tons

Weight: 8,500 lbs

SERVICES:

- Piezocone Testing (CPTu)
- Seismic Piezocone (SCPTu)
- Soil and groundwater sampling
- High resolution site characterization (MiHPT/EC/UVOST)
- Piezometer installation
